SUMMARY

Over 4 years of IT experience, 2 years of professional experience working for Discover Financial Services as a Data Engineer developing pipelines for cloud technologies and 2 years working for Illinois State University as a System Administrator managing various enterprise applications. I am also a member of the National Society of Collegiate Scholars (NSCS).

EDUCATION

June 2019 – *Bellevue University*
November 2021 *Masters Of Science – Data Science*

August 2015 – *Illinois State University*
June 2019 *Bachelors Of Science – Systems Development/Analytics*
Minor in Business – Business Administration

TECHNOLOGY

Languages

- Python – 3+ years
- SQL/NoSQL – 1.5+ years
- Java – 1+ years
- Spark – 0.5+ years
- R – 1+ years

Software

- Microsoft Excel, Word, Outlook, Office
- PyCharm
- RStudio
- Snowflake
- Visual Studio

EXPERIENCE

June 2019 – *Data Engineer, Discover Financial Services (DFS)*
Present

- Currently working as a Data engineer at DSF and it's my first full time position out of college. Main project includes on-boarding business users to cloud technologies to help develop pipelines to allow them to access the data that they need using cloud based tools.

August 2017 – *System Administrator, Illinois State University at Administrative Technologies (AT)*
May 2019

- Worked as a Sys Admin for AT maintaining (users, security, app updating, etc.) different apps used throughout the university.

May 2017 – *System Administrator Intern, Illinois State University at Administrative Technologies (AT)*
August 2017

- System Administrator role; learned about the various apps the university uses and how to properly maintain and handle security for each app.
